

U.S. EXHIBITOR DIRECTORY

North American Neighbors Healthy Foods

November 8–9, 2022

Dear Canadian Partners,

We welcome you to join our Virtual Market Showcase “North American Neighbors: Healthy Foods.” Our goal with this Virtual Market Showcase is to introduce U.S. exporters of natural and organic products to Canadian businesses, and to demonstrate to U.S. exporters the retail opportunities for their products in Canada.

You will have the opportunity to meet one-on-one with established U.S. exporters through the virtual business-to-business meetings during the Virtual Market Showcase, which will be held from November 8-9, 2022. The USDA Foreign Agricultural Service and our partners have consulted with each of the U.S. exporting companies to give them an overview of the Canadian market, including an overview of what it takes to be successful in Canada. We are confident the companies understand the complexities of exporting to Canada, and they are prepared to have constructive business meetings with you and your company.

We will be using the IMEX Export Marketplace as the online platform for the event. We encourage you to meet the participating U.S. companies and review their products through their exhibitor listings at naneighborshealthyfoods.usa-pavilions.com. Please free to submit questions to kboyce@boycemarketing.com or contact Kathy at 416-523-1470.

Thank you, and we look forward to your participation.

Sincerely,

Tyler Babcock

Over the last year we at U-LUV foods have been perfecting a cookie for those who suffer from food allergies or food intolerance and are looking for a healthier snack. As a family brand, we know what it is to live with food allergies because we have them ourselves. Let's be honest. You have bigger things to worry about than what cookie to purchase for your family. Food should be simple. Key word, should. It's often not when it comes to allergies. "This one is gluten-free but nut-free"; we know how hard it can be to find a product that means all your (and your loved ones) dietary restrictions. And we're here to change that.
