“

The Ministry of Energy is actively supporting industry initiatives, such as the development of solar rooftop systems, and the implementation of green towers. I anticipate that this forum serves as a pivotal platform to ignite innovation and drive the adoption of clean energy solutions. Thailand targets to achieve carbon neutrality by 2050 and to reach net-zero gas emissions by 2065.

”

Dr. Sompop Pattanariyankool
Deputy Permanent Secretary,
Ministry of Energy

Event Overview

The Future Mobility Asia and Future Energy Asia Exhibitions and Summits, were held in Bangkok, Thailand, from 15 – 17 May 2024.

These events welcomed 18,000+ international attendees, 3,000+ delegates, 500+ speakers - including ministers, CEOs, policymakers, innovators, and future leaders – as well as 200+ exhibiting companies from across the entire energy supply chain to influence, support and deliver Asia's clean energy vision.

Opening Ceremony

At the Opening Ceremony keynote address, Dr. Sompop Pattanariyankool, Deputy Permanent Secretary, Ministry of Energy, Thailand, highlighted the importance of the combined platform as a crucial forum for igniting innovation and driving the adoption of clean energy and mobility solutions.

Addressing an audience of ministers, policymakers, CEOs and senior leaders from across the entire energy supply chain, Dr. Sompop emphasised on the importance of future low-carbon energy initiatives, backed by intense policy strategies, with a focus on cleaner and greener energy solutions, particularly in the transport sector.

The importance of international collaboration was also highlighted as essential for a sustainable future, and to achieve unity in developing innovative solutions.

Exhibition Overview

The 2024 Future Mobility Asia and Future Energy Asia Exhibitions featured 200+ companies from across the world, representing the entire mobility and transport supply chain, showcasing the latest ground-breaking technologies.

Specialised Industry Zones

Enabling Technologies

Components and aftermarket supplies

EV Charging Infrastructures

Energy Storage Systems

EV Batteries

Exhibition Highlights

The exhibition established a vital forum for networking, collaboration, and partnerships, pivotal for Asia's response to global mobility and energy challenges. At the event, exhibiting companies fostered unprecedented interactions with attendees, with this convergence having increased significant deal-making opportunities crucial for the widespread adoption of clean mobility and smart transport solutions.

Attendees by Geography

“ Future Mobility Asia is the main annual event to expand my network in the electric mobility community in Southeast Asia. We participate at Future Mobility Asia because of its nature of setting trends in a volatile EV market including its services and enablers like convenience charging and AI. This is the place to discuss and learn about future trends and establish business leads out of a content-driven discussion. ”

Conference Programmes

Across eight conferences and more than 300 sessions, Future Mobility Asia, and Future Energy Asia brought together more than 500 industry leading speakers, across three simultaneous Strategic Summits, and two Technical Conferences alongside two dedicated Regulatory Forums.

Over three days, the combination of summits and conferences addressed pressing mobility challenges through dialogues with global ministers, policymakers, leaders and industry innovators, providing delegates with insights that enhanced understanding, sparked innovation, and fostered the adoption of advanced clean mobility solutions, driving Asia's pivotal role in the global transition and reinforcing its commitment to solving energy challenges.

Future Mobility Asia Strategic Summit Highlights

The Future Mobility Asia Strategic Summit brought together C-level executives and thought-leaders from across the global value chain, and examined the key strategic trends and technological innovations that shape the future of the mobility industry.

2024 Summit Themes:

Southeast Asia's Rise as a Mobility Industry Hub

Mobility's Masters: Inside The Minds of Asia's Change Makers

Ecosystem Architects: Looking to The Future of Mobility

Breaking Boundaries: Venturing & Start-Up Scene

Opening Keynote

Thailand's Clean Mobility And Future Roadmap

- Thailand's journey towards the goal of transforming the mobility landscape of Southeast Asia and beyond is encapsulated in the "Thailand Clean Mobility" programme, which is not just a policy framework, but a call-to-action to reduce greenhouse gas emissions from the transport sector, significantly.
- Thailand aims to be a leader in ASEAN's mobility transformation, exemplifying how regional co-operations and technological actions can yield substantive benefits in tracking global challenges.
- Challenges such as hard risks in infrastructure development, technology adaptations and public acceptance are prevalent in Thailand, and this requires innovation, persistence and co-operation.

Leadership Panel

Southeast Asia's Evolutionary Drive: Game Changers in Mobility Transformation

- Last year alone, Southeast Asia had a total sales of 25 million motorbikes – half of which were by Indonesia, with Vietnam in second place, and Thailand and Philippines coming close.
- SEA has a fast growing economy but what is unique is the socio-economic infrastructure and also the urban-rural populations. Are there enough efforts for all populations or is there a biased focus on the cities only?
- Government incentives and the process of phasing out old vehicles should be made available not just for the OEMs, but for the entire mobility value chain.
- The amount of data that is being associated with cars or batteries that we are making is massive. There is a need for new technologies to grab these data by associating it with products that are still designed in an old-school way.

“ On e-scooters, the statistics speak for themselves. Last year alone, Southeast Asia had a total sales of 25 million motorbikes – half of which were by Indonesia, with Vietnam in second place, and Thailand and Philippines coming close.

Networking At the Event

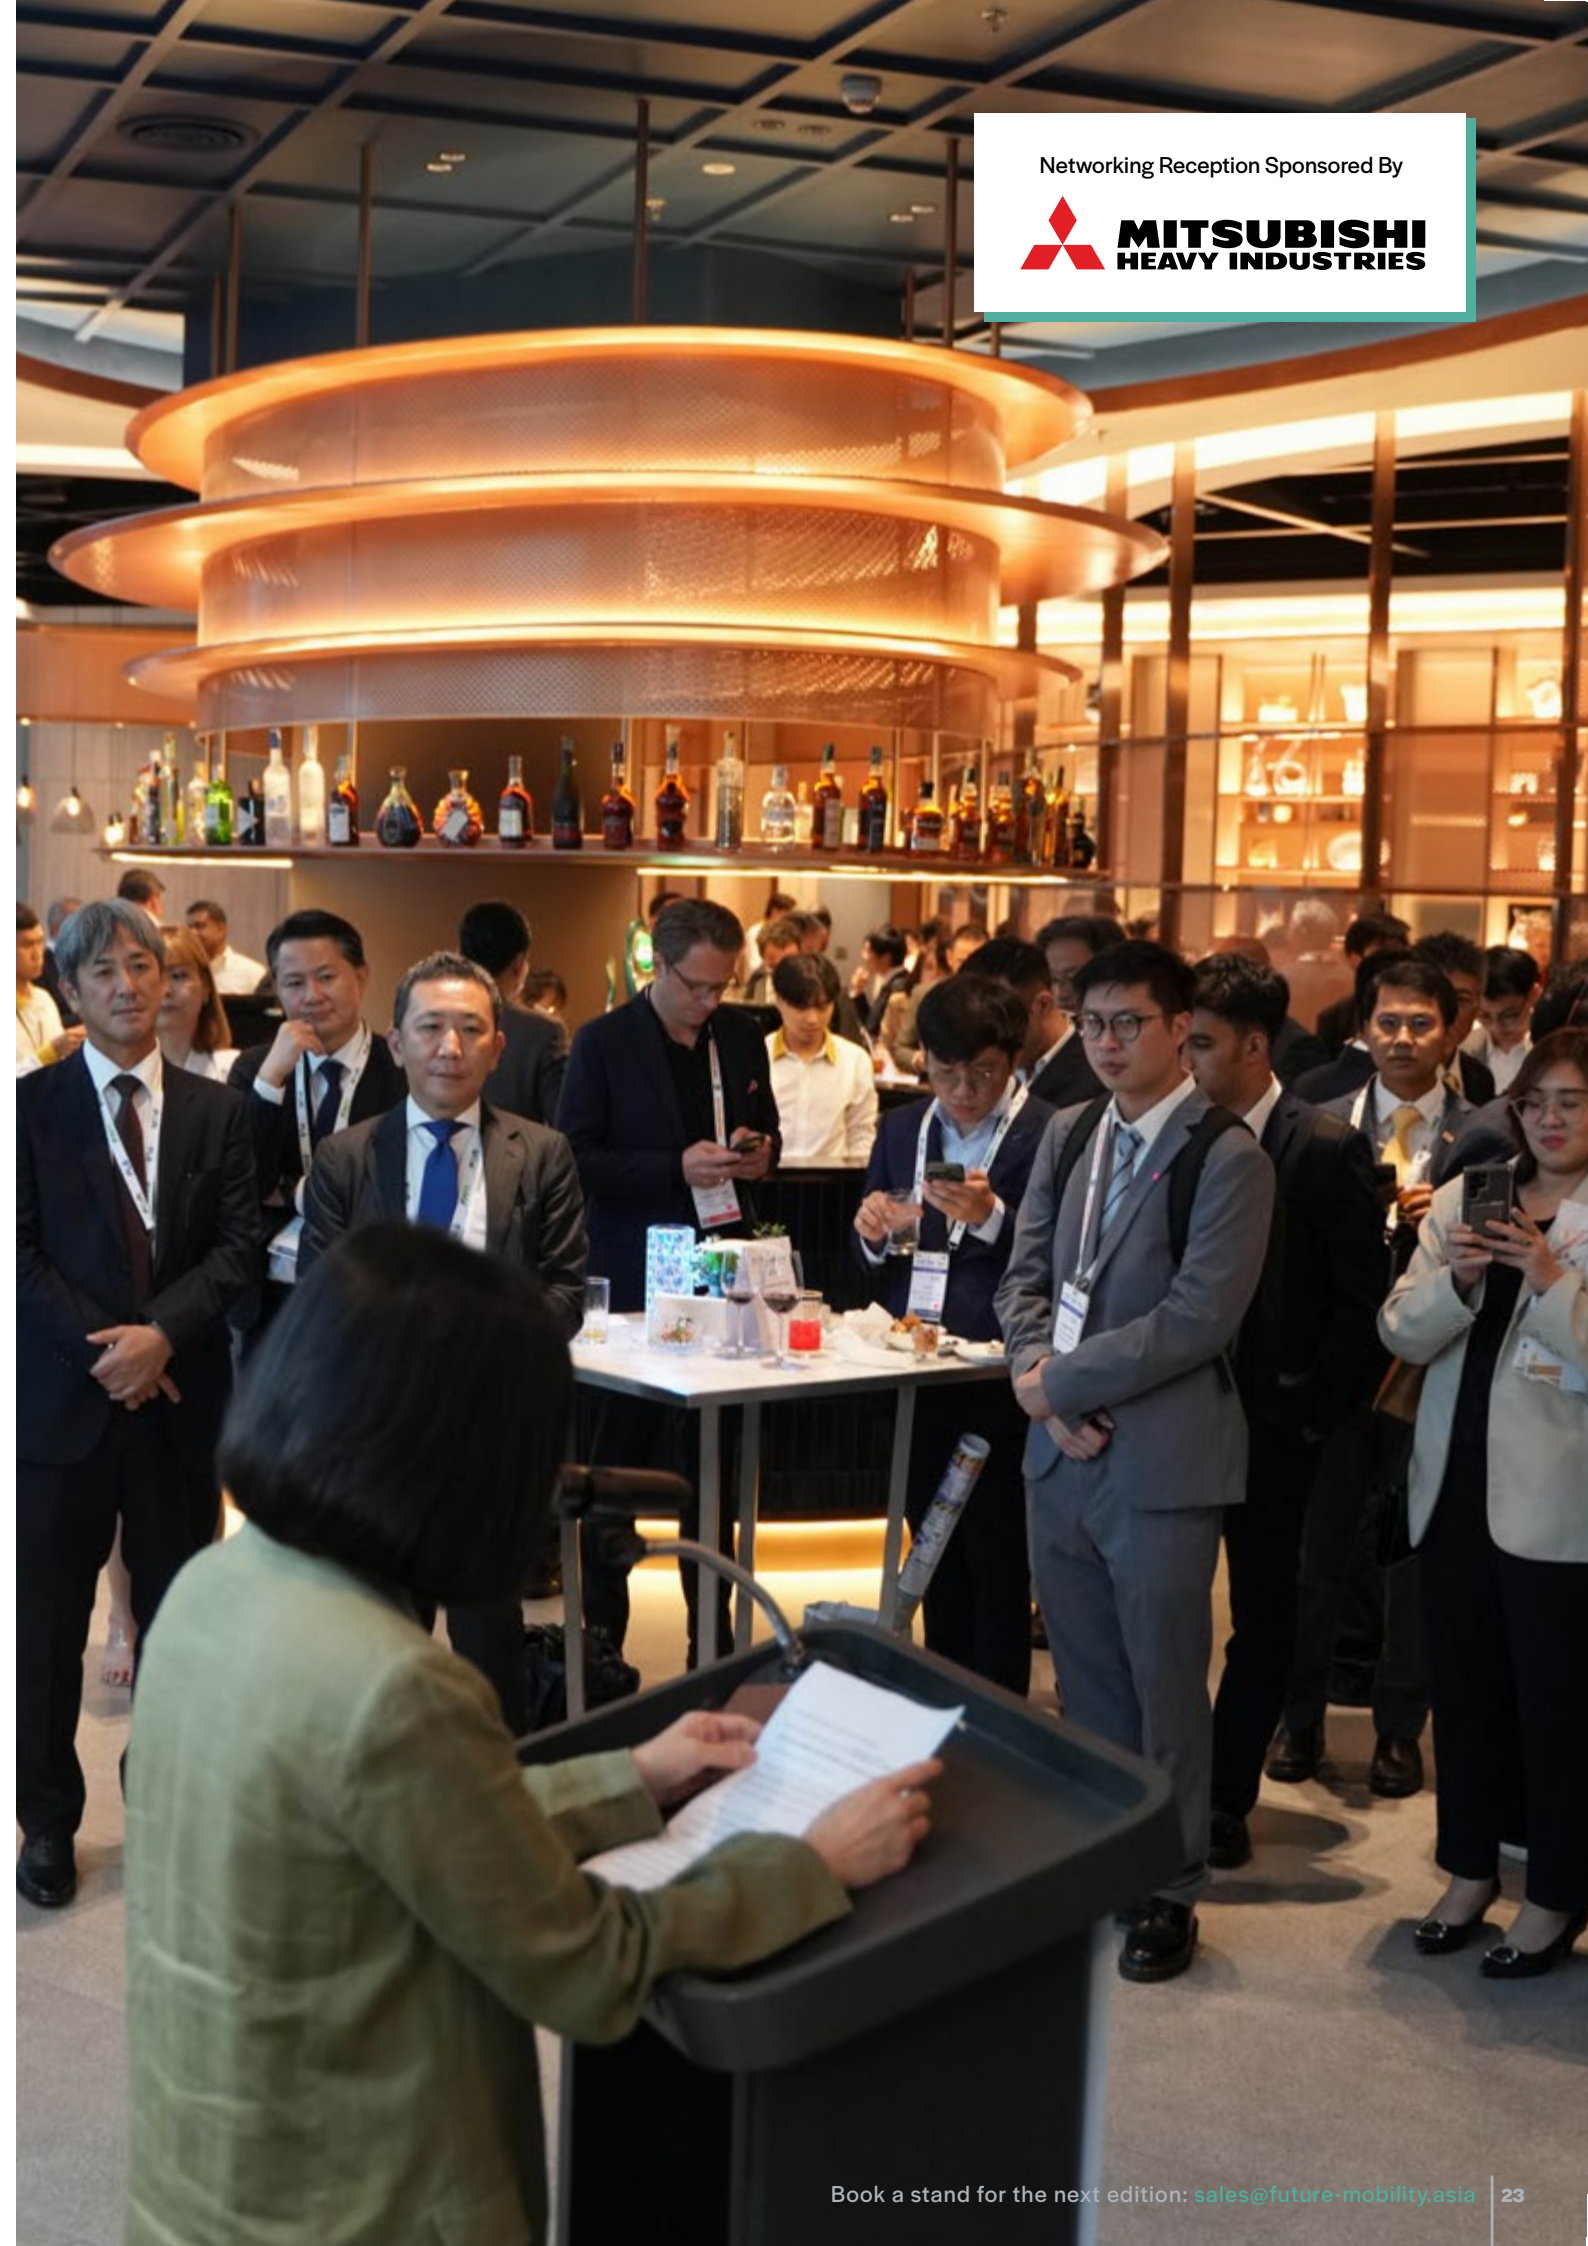

Future Mobility Asia and Future Energy Asia provided numerous networking opportunities with the aim of enhancing cross-border collaboration and the exchange of ideas, creating the perfect environment for VIPs, delegates, exhibitors and visitors to network and forge new business partnerships.

A purpose-built business matching lounge provided attendees with a conducive environment to discuss business.

An open-invitation Networking Reception, sponsored by Mitsubishi Heavy Industries also enabled attendees to network in an informal, social setting, away from the busy exhibition floor.

Networking Reception Sponsored By

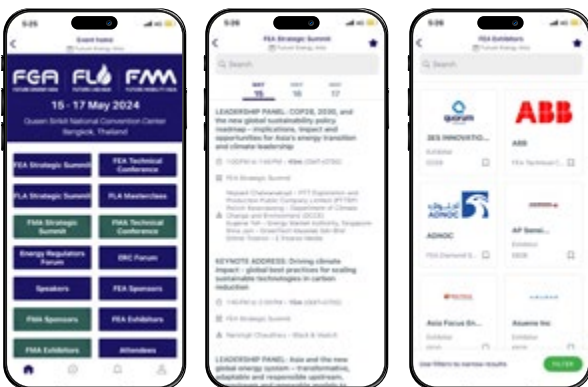

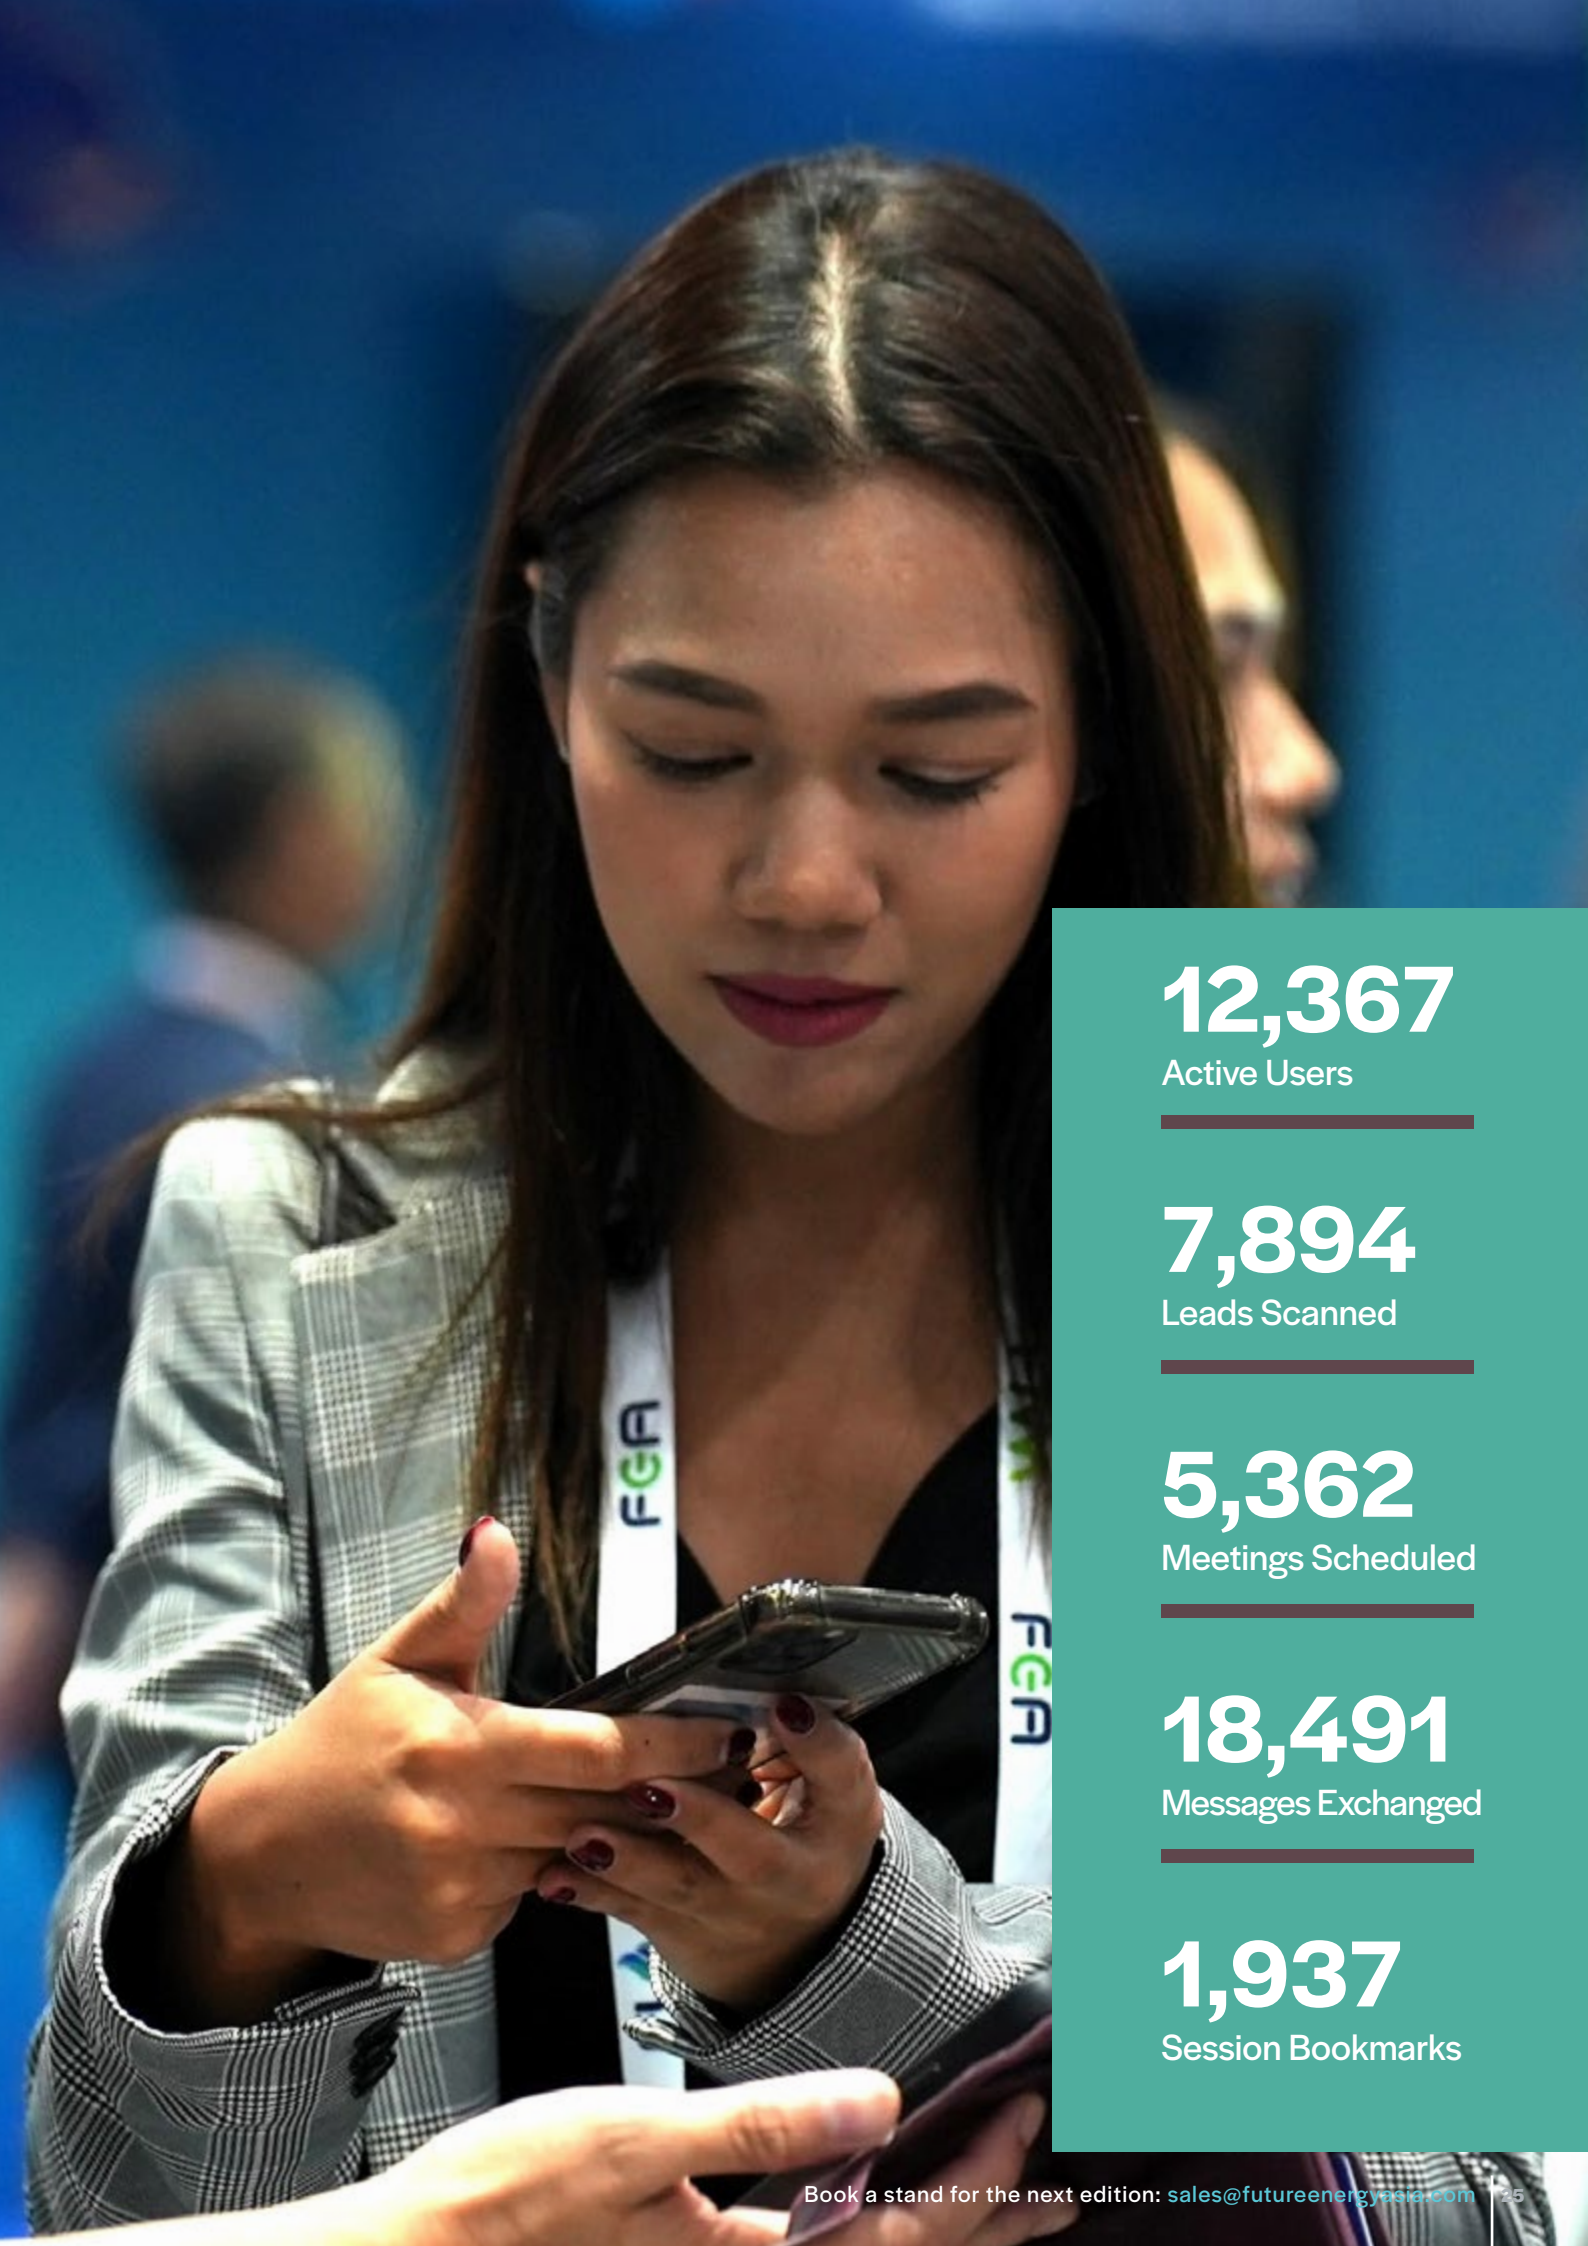

Official Event App

The Official Event App was a bespoke networking platform that enhanced the attendee experience at Future Mobility Asia and Future Energy Asia.

With AI-powered matchmaking features, participants were able to network and explore business opportunities with other visitors, delegates, speakers, exhibitors and sponsors.

Attendees enjoyed a seamless and innovative digital experience that enabled them to maximise their time at the events.

Marketing & PR Reach

From Thailand to Asia and beyond

The event conducted a targeted marketing communications campaign, which ran in the lead up to, during and after the events to reach our varied audiences.

Working closely with our exhibitors, sponsors and partners, speakers, energy experts and event participants, the communications campaign ensured that key messages, critical opinions and outcomes from the event were shared with the rest of the world.

This enabled us to showcase the events' role as pivotal platforms for stakeholders to forge partnerships, share innovative solutions, and shape policies that will collectively advance the global pursuit of a sustainable energy future.

2025 Floorplan

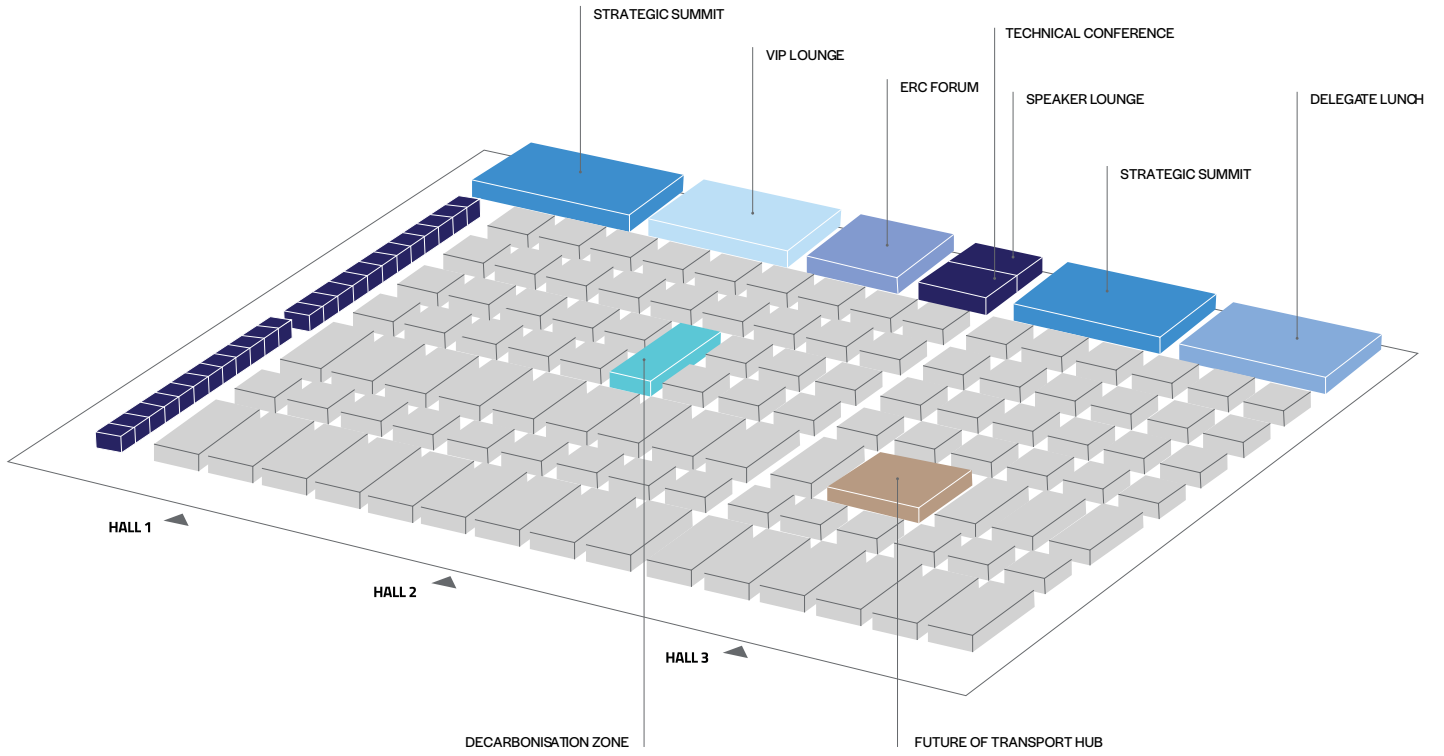

The fourth edition of Future Mobility Asia, scheduled to take place in Bangkok from 7-9 May 2025, will once again represent a platform for innovation in the heart of Southeast Asia.

These events will showcase the innovative energy and mobility solutions crucial for successfully transitioning to a low-carbon future, helping redefine industry standards and enhance government and market responsiveness to environmental and economic challenges.
