GLOBAL ENERGYSHOW EXHIBITION & CONFERENCE CANADA

June 11-13, 2024

BMO Centre, Stampede Park, Calgary, Canada

EVENT BROCHURE

ENERGY POWERINGOPPORTUNITY

North America's leading B2B energy exhibition and conference bringing technology, innovation and the transfer of knowledge under one roof June 11-13, 2024.

Ranked as the fourth top energy producer in the world, Canada has the opportunity to showcase its expertise in energy production, storage, technology and innovation.

As global energy markets are changing amidst geopolitical shifts and increasing energy demand, government leaders and industry executives are prioritizing long-term sustainability and investment strategies to help accelerate a low-carbon economy.

Hosting five halls of exhibition space, two conferences and an awards gala, Global Energy Show Canada foster innovation, leadership and synergy between all energy verticals within three fully-packed days.

Hosted June 11-13, 2024 in Calgary, Global Energy Show Canada offers participants the opportunity to connect with 600+ exhibitors, 350+ expert speakers and 30,000+ qualified attendees under one roof.

Canada Ranked:

4th largest oil producer

5th largest natural gas producer

4th largest hydroelectricity producer

6th largest generator of nuclear power

Top 10 hydrogen producer

GLOBAL ENERGY SHOW IN NUMBERS

600+ exhibiting companies

350+ expert speakers

22,500+ represented companies

30,000+ Global Energy Show attendees

GLOBAL **ENERGYSHOW** STRATEGIC CONFERENCE CANADA

Tuesday, June 11 - Thursday, June 13

Welcome to Global Energy Show Canada 2024. The global energy landscape is changing rapidly, and we are excited to share collective experiences, inspire change and form new connections to address the greatest challenge of our generation, meeting the demand for energy while lowering our carbon emissions.

This year's conference is a pivotal purpose-based meeting of the global energy ecosystem that is shouldering the huge challenge of balancing our climate targets while supplying clean, and responsibly produced affordable energy to those who need it. The conference presents a unique opportunity to showcase practical and groundbreaking answers to the most pressing questions of our generation, including how we finally focus on the customer through the energy transition, our domestic and international energy relationships and how we navigate through political and market uncertainty.

CONFERENCE THEMES

Increased Investment in Canada's **Energy Sector**

The billion-dollar-plus deals in the Canadian energy sector in 2023 is the sign of a bullish industry on the rise. Investors are looking to get back into the energy sector in a big way, and with demand for energy higher than ever, there is a confidence in the sector that hasn't been seen in years. Companies have capital to spend, and they're looking to consolidate their strong position with increased mergers and acquisitions activity and deals continuing to be struck.

New Canadian Energy Projects Driving Decarbonization and Global Energy Supply

There is a clear runway to get major new infrastructure built, including cross-border pipelines. As a result the recent Supreme Court decision on Bill-69, approvals can be sped up and investor confidence will be high as a result of this major legislative ruling. Furthermore, with hydrogen projects being built in Atlantic Canada and the Edmonton Region, as well as LNG Canada and TC Coastal link nearing completion, there is a huge opportunity for Canada to take advantage of it's resource potential to provide the world ethically produced, affordable energy.

Canada's Renewable Future to Push our Transitional Energy Goals

Canada is a world leader in the production and use of energy from renewable resources, and electricity generation from renewable sources is expected to continue increasing as we transition to a lower carbon future. With the wind, and hydro resources at our disposal, and our nuclear and hydrogen potential being realized as a long-term vision, the renewable sector is playing an important part in moving towards our decarbonization targets.

Digital Technologies

Canada's energy sector is evolving quickly by embracing digital technologies like Artificial Intelligence and the Cloud. These technologies drive sustainability and create growth and innovation opportunities for organizations. Increasing efficiency, reducing operational costs, and managing cyber security risk as important to companies as their sustainability goals, digitalization will remain at the top of companies agendas

The Iceland Delegation at the Global Energy Show in Calgary was led by Áslaug Arna Sigurbjörnsdóttir, Minister of Higher Education, Science and Innovation and organized by the Business Iceland, Green by Iceland, and the Embassy of Iceland Canada.

The delegation met with impressive companies and organizations in Calgary and got an insight into innovative government policy and projects in meetings with **Katherine White**, Alberta's Deputy Minister of Jobs, Economy and Innovation and Demetrios Nicolaides, PhD, Alberta's Minister of Advanced Education. Our hope is that we continue those relationships and that Iceland, technology and services, becomes a part of the solution in Canada.

HLYNUR GUDJONSSON

EMBASSY OF ICELAND CANADA

Partnerships and Progress for an **Equitable Transition**

With indigenous energy projects on the rise and the potential for a Loan Guarantee Program supporting Indigenous participation in infrastructure projects, meaningful opportunities for Indigenous participation is an essential part of an equitable energy transition in Canada. Further, workforce demographics are a concern for the industry. The labour pool is shrinking due to ageing workers and difficulties reattracting experienced workers, which means there is work to do to attract a new generation of leaders and young professionals from diverse backgrounds to the energy sector

GOVERNING BODY

Alicia Couto Venture Manager, Energy & Cleantech Innovate Calgary

Alison Thompson CEO Borealis GeoPower

Breanne Fox Director, Commercial Management & Carbon Technologies Capital Power Corporation

Candice Paton Executive Director, Regulatory and External Affairs **Enhance Energy**

Canon Bryan Chief Financial Officer Terrestrial Energy

Cara Wolf Founder and CEO Ammolite Analytx

Daria Hasselmann Senior Manager, Community Relations Woodfibre LNG Limited

David Layzell Research Director The Transition Accelerator

Gregory John President Four Peaks Business Development Ltd.

Dr. Heather Exner-Pirot Director of Energy, Natural Resources and Environment program Macdonald-Laurier Institute

Ivette Vera-Perez President & CEO Canadian Hydrogen and **Fuel Cell Association** (CHFCA)

Kelly Oale President and CEO Canadian Global Affairs Institute

Kevin Birn Vice President, North American Crude Oil Markets **IHS Markit**

Monica Gattinger Director, Institute for Science, Society and Policy University of Ottawa

Mustafa Sahin Edmonton Global Executive Vice President. **Investment & Trade**

Nima Ghazi President Innova Energy

Raveel Afzall President & CEO Next Hydrogen Corporation

Riley Found Senior Manager, Projects -New Nuclear Growth Ontario Power Generation

Ron Hoffmann Vice President, Business Development SixRing Inc.

Shannon Halliday VP, Sales, Marketing & Technology Solutions HTEC

GLOBAL ENERGYSHOW

TECHNICAL CONFERENCE CANADA

The Global Energy Show Technical Conference brings together technical experts from around the world to present and discuss the latest technologies, processes, and innovations to help companies increase efficiencies, save costs, and achieve net zero.

Delegates will hear from over 100 speakers providing access to a wealth of critical industry-leading knowledge and networking. The conference format includes individual technical presentations, panel discussions, round tables, and poster session on the exhibition floor.

Technical presentations are selected based on a peer reviewed process by our prestigious Global Energy Show Technical Committee who represent the top technical and project-based organizations from around the world.

The Clean Technology & Environment Theatre will cover topics and technical innovations to reduce environmental impacts and increase the efficiency of all forms of energy production. This theatre will cover topics including clean technology and environmental management, methane emissions and CCUS.

The Transformative Energy Theatre will cover topics and technical solutions covering other energy sources including hydrogen, nuclear and renewables such as solar, wind, geothermal and hydropower. This theatre will cover topics including hydrogen, renewables and sustainable electricity generation and grid modernization.

The Sustainable Oil & Gas Theatre will cover topics and technical solutions to assist oil and gas companies in reducing emissions, increasing efficiency and limiting the environmental impact of production. This theatre will topics including cleaner hydrocarbon production and enhanced oil recovery, reservoir engineering, drilling and completion along with field development and infrastructure.

2024 TECHNICAL COMMITTEE INCLUDE

Adam Leece Manager, Decarbonization and ESG Integrated Sustainability

Alex Lafreniere Carbon Advisory McDaniel

Alfredo Leon Senior Engineer - Customer Application Engineering Baker Hughes

Ali Telmadarreie Co-founder & CEO CNERGREEN

Amir Moutameni Senior Advanced Project Engineer - Canada Honeywell

Anamika Mukherjee Partner, Sustainability Venture Fund BDC

Andrea Bernal President **AnBound Energy**

Behnaz Afsahi LaFrenz Environmental and Sustainability Engineering Manager Canary Biofuels Inc.

Cesar Castillo Technical Safety Engineer Canadian Natural Resources Limited (CNRL)

Cesar Vera Chief Commercial Officer Naviera Integral

Cheryl Trudell Joint Interest Production Manager Imperial

Chris Wallace Manager, Energy and Climate Protection ILF Consultants Inc. (Canada)

Dr. Elden Jaafar International Energy Expert IPE

Dr. Huazhou (Andy) Li Associate Professor University of Alberta

Dr. Reza Fassihi Founder & Principal Beyond Carbon

Frank Engli Senior Maintenance and Turnaround Advisor Becht

Gord Crawford President and Chief Operating Officer Expander Energy Inc.

Jeff Earl Director, Business Development Sapphire Technologies

Jennifer Chen **GHG Impact Quantification Emissions Reduction** Alberta (ERA)

Jide Akinlade President & Principal Consultant OGAB Engineering

Jim Atkins Account Manager, Eastern Region, North America **SUBNET Solutions Inc.**

Kavan Motazedi Director of Decarbonization Modern West Advisory

Kelly Newnham Senior Vice President, New Markets Worley

Kevin Sy Project Manager **Ensol Systems**

Kirill Kovalenko Technical Services Engineer FlexSteel Pipeline Technologies, Ltd

Krzysztof Palka Founder & CEO Akine Inc.

Mark Beckman Manager, In-Situ Research Group Imperial

Mehr Nikoo Senior Manager -Sustainable Materials Alberta Innovates

Mridul Kumar Principal Advisor and Unit Manager, Reservoir erformance Products Chevron

Nermine Sorial Director, New Energy Technologies **Exergy Solutions**

Orlando Castellanos Diaz Technology Development Scientist and Sustainability The Dow Chemical Company

Reihaneh Irani-Famili VP Clean Energy Development and Infrastructure Investment National Grid

Roland Plett Business Development Manager, Energy and Mining Cisco Systems

Scott Irvine Director of Data & Analytics - Energy & Utilities Microsoft Canada

Scott Kwas E-Mobility Network Planning Manager NA Shell Mobility

Tair Ibatullin Manager Carbon Sequestration Engineering Enbridge Inc.

Tim Leshchyshyn President FracKnowledge

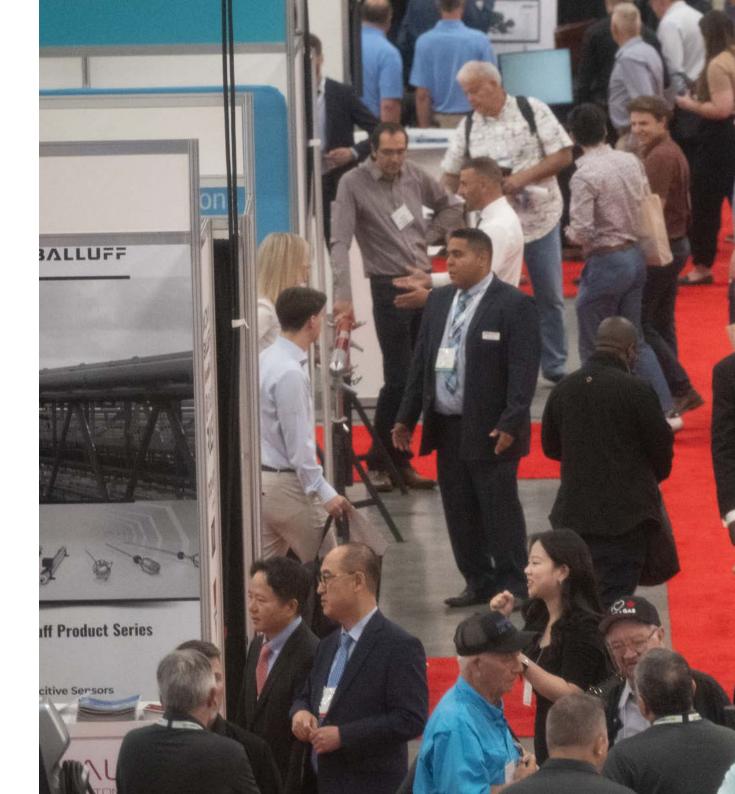

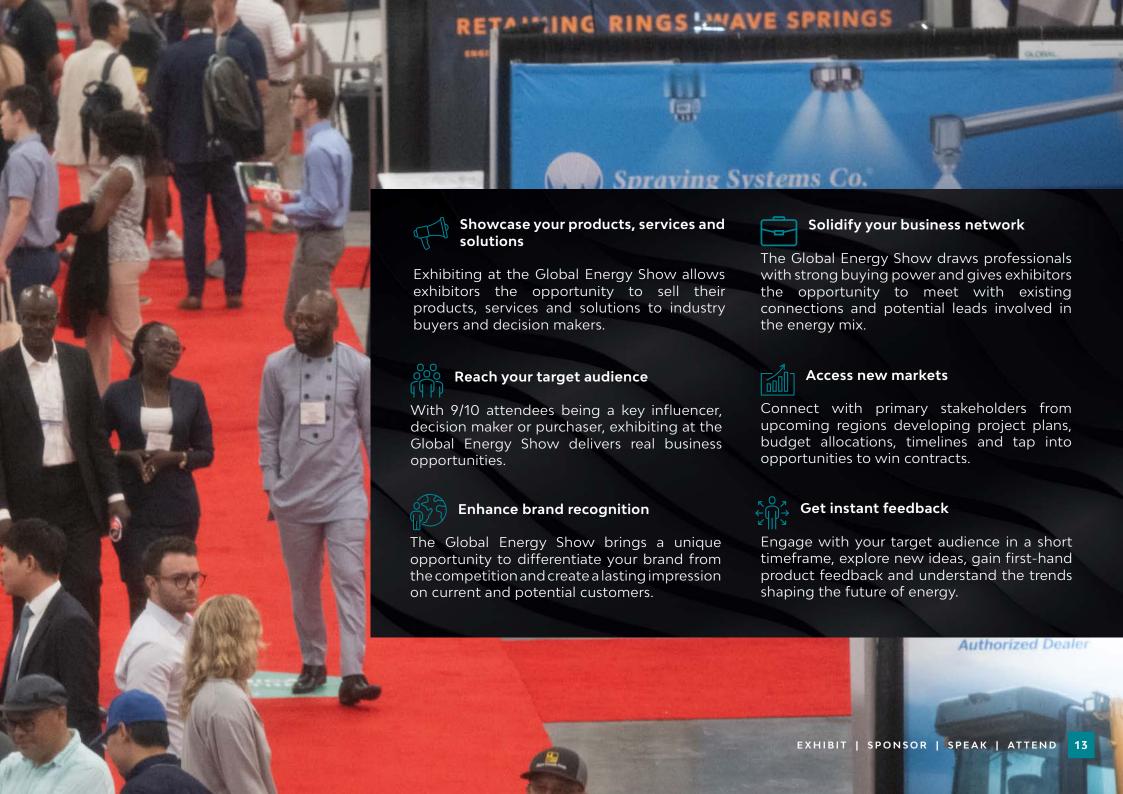

Viren Parikh Director of Business Development - Energy Ericsson North America

WHY EXHIBIT AT THE GLOBAL ENERGY SHOW?

The Global Energy Show is the ideal platform for companies from across the entire energy landscape to showcase their expertise and services to investors and buyers looking to do business in the North American market.

With **30,000+ industry professionals** expected to attend over three days of industry innovation, knowledge exchange and networking, the exhibition provides companies the unique opportunity to maximize brand exposure to the right audience.

EVENT MAP

ISA Calgary Show

Co-located at Global Energy Show Canada, the ISA Calgary show is an event dedicated to automation professionals, showcasing best practices, the latest technology and solutions that improve quality, lower costs, increase efficiency or raise safety standards. All Global Energy Show Canada attendees have access to the ISA Calgary Show.

Pipeline Zone

The Pipeline Zone provides a forum for industry, government, regulators and the public to learn more about the leading cutting-edge technology in pipeline engineering, maintenance and regulatory landscape of the Canadian energy market.

Propane Zone

The Propane Zone is a dedicated area on the exhibition floor where exhibitors will showcase products, technology and solutions related to the propane supplychain. This specialized zone features exhibitors showcasing solutions in production, storage facilities, distribution centres and transportation.

Startup Zone

The Startup Zone is dedicated to showcasing startup companies and associations that present the latest innovative technologies and solutions in the dynamic landscape of the energy industry. This zone provides a platform for emerging businesses to foster connections and be at the forefront of the energy conversation.

CCUS Zone

The Carbon Capture, Utilization and Storage Zone features technology and decarbonization solutions that are impacting the reduction of CO2 emissions into the environment. Companies in this zone develop, manufacture, or deploy technologies that help reduce methane emissions.

Hydrogen Zone

The Hydrogen Zone is the dedicated space for exhibitors to showcase advancements and innovations in the global hydrogen economy. This zone serves as a hub for industry leaders to explore and discuss the transformative potential of hydrogen in the evolving landscape of sustainable energy solutions.

Digital Energy Zone

The Digital Energy Zone serves as a platform for exhibitors to demonstrate how digital innovations are shaping the future of the energy industry. This dedicated zone highlights technological advancements in the digital realm, encompassing areas including artificial intelligence, security, and more.

Decarbonization Zone

The Decarbonization Zone showcases exhibitors that are presenting products and technology that are designed to reduce carbon emissions in the energy sector. Exhibitors in this zone showcase solutions that contribute to a sustainable and environmentally-friendly energy landscape that lead to important discussions about decarbonizing the industry.

EXHIBITION OPPORTUNTIES

INDOOR HARDWALL EXHIBITION PACKAGE

A ready-made hardwall shell scheme stand so you can turn up with your products, services and brochures. Additional features and customization can also be done through our official contractor, Goodkey Show Services. Includes floor space, standard grey booth carpet, hardwall shell scheme, customizable counter, two (2) stools, name board, daily janitorial, one (1) 1500-watt electrical outlet, basic onsite materials handling to booth (up to 5000 lbs. per crate, except for specialty work), crate storage during the show, 24-hour roaming security, and unlimited client invitations to attend the exhibition.

Hardwall Shell Scheme starting at \$64.50/sq. ft

INDOOR EXHIBITION PACKAGE

A standard exhibition solution with Pipe & Drape so you can turn up with your products, services, and brochures. This offering includes floor space, standard grey booth carpet, a name board, daily janitorial, one (1) 1500-watt electrical outlet, basic onsite materials handling to booth (up to 5000 lbs. per crate, except for specialty work), crate storage during the show, 24-hour roaming security, and unlimited client invitations to attend the exhibition. Additional furniture can be ordered through our official contractor, Goodkey Show Services.

Standard pipe & drape booth starting at \$55.75 /sq. ft

OUTDOOR SPACE ONLY PACKAGE

An opportunity to activate in our Outdoor Zone includes prime ground space, basic onsite materials handling to the booth (up to 5000 lbs. per crate, except for specialty work), one (1) parking pass (good for move in/out days only), 24-hour roaming security, basic company listing on the Official Event Website and unlimited client invitations to attend the exhibition.

Starting at \$13/sq.ft

EMISSIONS REDUCTION THEATRE

Led by Methane Emissions Leadership Alliance (MELA) this popular and exciting show feature showcases most complete source of data, technologies and solution providers that monitor, measure, and reduce methane emissions.

FUTURE FORWARD NEXT GEN THEATRE

Find out about energy jobs of the future that will provide solutions and innovations needed to hit our climate targets and affordable and accessible energy around the world.

PLUG AND PLAY INNOVATION THEATRE

In partnership with the leading innovation platform, connecting startups, corporations, venture capital firms, universities, and government agencies, we will be showcasing the companies that are driving change and making a difference to the future of our planet. This accessible and purpose-based theatre will showcase leading lights and the luminaries essential in our quest for a cleaner tomorrow.

EQUITY THEATRE

The 2024 Global Energy
Show is placing diversity and inclusion at the very core of the show by bringing back the Equity Theatre powered by YoungWomen in Energy (YWE), 3 days of accessible free-to-attend content that will highlight the successes, challenges, opportunities for diversity and inclusion, as well as the road ahead as we strive for a more diverse and fair workplace.

LEADERSHIPROUNDTABLES

The Global Energy Show Canada Leadership Roundtables form an integral part of the event, hosting several closed-door meetings on a range of topics. The invitation-only roundtables provide a forum for participants to influence and lead the future of energy.

AFTER PARTY CONCERT

Join us on Wednesday, June 12 for an exciting concert experience where visitors can let loose in a casual setting. Organized off-site of Global Energy Show, guests can finish the busy day of exhibition and conference and head to a casual setting to network and strengthen relationships.

GLOBAL ENERGYSHOW AWARDS GALA CANADA

The Global Energy Show Awards, now in its 8th year, shines a spotlight on excellence in the energy industry here in Canada and around the world. The Awards recognizes and celebrates leaders, innovators and trail blazers accomplishments over the last 12 months who have been at the forefront in leadership, innovation, sustainable solutions and promoting the healthy advancement of the energy sector.

The 8th edition of the Global Energy Show Awards will take place on June 11, 2024, in Canada's energy capital Calgary, Alberta where nominees and winners will be celebrated in an exciting evening gala filled with entertainment, chef driven multi-course dinner and high caliber networking.

2024 AWARD CATEGORIES

COLLABORATIVE TRENDSETTER AWARD

DISRUPTIVE DIGITAL INNOVATOR AWARD

EMERGING CLEAN TECHNOLOGIES AWARD

EMERGING LEADER AWARD

EXCELLENCE IN POWER GENERATION AWARD

INNOVATION IN TECHNOLOGIES: EQUIPMENT OR PROCESS CONTROLS AWARD

SUZANNE WEST ENVIRONMENTAL EXCELLENCE AWARD

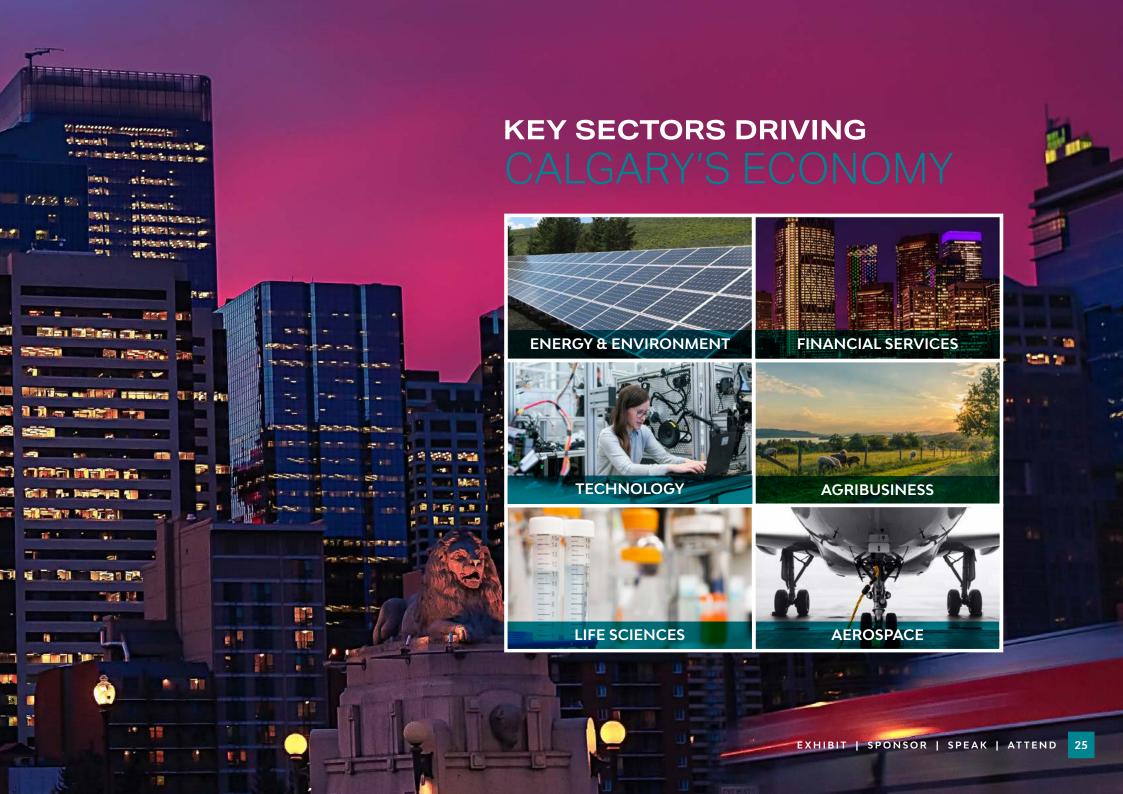

DIVERSITY AND INCLUSION AWARD

ABOUTCALGARY

Calgary, Alberta has small-town heart and big-city diversions. Between street festivals, nightlife and all the things to do outside, the work-hard, play-hard approach is in this city's veins.

Calgary has long been known as an energy city. Alberta is Canada's largest oil and gas producer and is hope to vast oil sands deposits. Calgary is the epicenter of the energy industry in Canada with head offices of every major company in the upstream, midstream and downstream sectors located in the city.
