INDUSTRY CHALLENGES

A rising and highly competitive region facing challenges of a fully integrated and global economy

Indonesia has shown a robust growth in the last years. With a large and dynamic population, the country has emerged to come at the forefront of international trade and become a very attractive target for international investments.

Animal feed market in the country is expected to grow at a compound annual growth rate (CAGR) of over to reach a market size of US\$12.208 billion in 2025 from US\$7.475 billion in 2020.

Main challenge in the future will include population growth, urbanization, increase in energy consumption, increase in meat consumption, decrease in land availability, increase in water requirement of agriculture and human need.
