Food 360 2020

FOOD

CONSUMERS' EXPECTATIONS AND BEHAVIORS

OBJECTIVES

Food 360™ is a multi-country market research conducted every 2 years since 2012 by Kantar France on behalf of SIAL.

This 2020 edition pinpoints the evolution of the consumers' attitudes, behaviors and expectations regarding their food and the different actors of the Food industry. It also highlights the areas of innovation which motivate consumers the most.

METHODOLOGY

FOR EACH COUNTRY

A representative sample of 500 individuals, aged 18 years old and more or 18-55 years old, was used according to the quota method

GEOGRAPHIC SCOPES

- France, Spain, Italy, Germany, UK and USA: nationwide
- Russia: cities with 100,000 inhabitants and more
- China: Tier 1/2/3 cities
- Middle-East (United Arab Emirates, Bahrain, Oman, Qatar and Saudi Arabia), South-East Asia (Malaysia and Indonesia) & India: urban areas

INTERVIEWS ONLINE

from March to May 2020 according to the countries

INTERVIEWS' CONTEXT

Before lockdown

France, Spain, Germany, UK, USA, Middle-East, South-East Asia

After lockdown

Italy, China, India

About Kantar

Kantar is the world's leading data, insights and consulting company. We understand more about how people think, feel, shop, share, vote and view than anyone else. Combining our expertise in human understanding with advanced technologies, Kantar's 30,000 people help the world's leading organisations succeed and grow.

Kantar is the world's leading evidence-based insights and consulting company. We have a complete, unique and rounded understanding of how people think, feel and act; globally and locally in over 90 markets. By combining the deep expertise of our people, our data resources and benchmarks, our innovative analytics and technology, we help our clients understand people and inspire growth.

EVOLUTIONS OF THE INNOVATIVE OFFERING

TRENDS AND NEW FOOD CONCEPTS

About ProtéinesXTC

ProtéinesXTC is today the leading consulting firm in strategy and communication specialized in the Food industry.

From product innovation to brand strategy and BtoB communication, ProtéinesXTC is able to respond throughout the value chain to the issues and challenges of society of food decision-makers and thus be in line with the increasingly strong demands of consumers.

WHAT MAKES THE UNIQUENESS OF PROTÉINESXTC

Women and men who are recognized experts in the sector: scientists, communicators, prospectivists, socioeconomists, etc. who make ProtéinesXTC an unrivalled platform of expertise.

Complementary expertise at a high level of competence: monitoring and prospective studies, scientific consulting, innovation workshop, brand and content strategy, crisis prevention and management, public relations.

Exclusive and unique proprietary tools: "L'Essentiel", a daily scientific monitoring on food, health and environment issues. Inspire Database, the world's first database of food innovations (products, recipes, packaging, positioning, etc.).

A perfect mastery of all the new communication tools and technologies. 25 years of recognized expertise at the service of food and innovation.

SIAL'S PARTNER

ProtéinesXTC, has been the Sial Network's Innovation Partner since 1996.

The "Trend Tree", created by ProtéinesXTC, is a hierarchical model that synthesizes all consumer expectations in five axes, breaks them down into new offering trends and lists the new levers used by manufacturers around the world to respond to these expectations. This exclusive segmentation is also used by our analysts to qualify all the innovations that integrate Inspire Database, and therefore the evolutions of the global offer that we present here.

Food innovation in China remains strongly focused on "Pleasure" values (nearly 7 out of 10 innovations in 2019 vs. 5 out of 10 for the world average). Above all, it is an offer that plays on the Variety of senses (new tastes, textures, etc.) and meets the Chinese consumer's desire to discover new experiences.

They are also premium products with a sophisticated character that are highly appreciated in China.

On the other hand, Naturalness is under-represented in food innovation in China compared to other regions of the world (Europe, North America). It is also worth noting the low number of plant substitutes and new food products that highlight ethical benefits (ecology, solidarity).

6,4% ETHICS

In France, Pleasure dominates in 2019 with a strong trend for Variety of senses and Sophistication. The latter is a major leverage of pleasure in France. There are outstanding products with premium ingredients, but also more ordinary products that become premium with the use of a luxurious ingredient, from a specific place, or in a sophisticated packaging.

Over the years, the Naturalness trend has been growing. In 2019, it is the second trend and represents more than

a fifth of the innovative offer with a growth of organic products and a simplification of recipes.

The Ethics trend is particularly dynamic in the innovative offer where we can find many products that promote a fair price for farmers and producers, animal welfare, charitable donations or a sustainable packaging.

German innovation is focused around Pleasure and Health. The Vegetal trend is superior compared to the world average, with a majority of ready-made meal and vegan protein drinks composed of legumes such as soybeans and peas.

While the Naturalness trend has been very dynamic in recent years, it only accounts for about one tenth of the innovative offer in Germany in 2019.

Ecology is also a growing trend with products that are more respectful of animal welfare and innovative ecological packaging.

INDIA MONDE

39,4% PLEASURE

35,2% HEALTH

12,7% PHYSICAL

11,3% CONVENIENCE

1,4% ETHICS

In India, food innovation is mainly focused on Pleasure and Health. Variety of senses and Sophistication trends are embodied by sweet products with original tastes and textures for the former, and with ingredients that are more upscale due to their origin or quality for the latter.

The dynamism of the Health axis is largely due to the Medical trend (more than double the world average). It includes many products with functional ingredients such

as moringa or other ingredients known for their health benefits like amaranth or turmeric.

In 2019, there is a significant Convenience axis which is exclusively composed of easy to handle offer, with formats that are more practical and easier to use.

Pleasure is the main axis of the innovative offer in Italy, neck and neck with Health axis. On the Pleasure axis, the offer is structured around a diversification of tastes with unusual products or combinations of ingredients.

Health axis, leaded by Naturalness, Vegetal and Medical trends; is composed of many vegan products with healthy meat substitutes and with nutritional benefits (rich in fibers, proteins...) for a wide variety of products.

■ MAGHREB AND MIDDLE EAST ■■■■ MONDE

38,5% PLEASURE

32,9% HEALTH

18,6% CONVENIENCE

8,7% PHYSICAL

1,3% ETHICS

The innovative offer in the Maghreb and the Middle East in 2019 is mainly focused around Pleasure.

The Health trend is increasingly dynamic with a product offer that highlights health benefits, usually supplemented with proteins, nutrients or other functional ingredients. Medical has thus become the second most important trend in this part of the world.

Compared to the world average, Practicality is a strong trend with products that are easier to handle, many of which make cooking easier.

Please note: The statistical rules do not allow us a breakdown of axes/trends over a single year for the Maghreb Middle East region. We have chosen to propose this breakdown over the last five years.

The 2019 Southeast Asia innovative offer is focused on Pleasure with a high tendency for Variety of senses (almost a third of new products).

The Health axis is the second most dynamic axis with a food innovation mainly focused on functional benefits (over double the world average). This includes food products enriched with vitamins, probiotics, low in calories or rich in fibers.

The highest number of innovative products in the Physical sector is in this part of the world, almost 3 times more than the world average. This offer is mainly represented by slimming and wellness products, particularly in the beverage's category: products low in sugar, fat or high in fiber.

■ UNITED KINGDOM ■ MONDE

48,1% PLEASURE

30,3% HEALTH

10,5% PHYSICAL

7,3% CONVENIENCE

3,9% ETHICS

The United Kingdom innovative offer in 2019 is dominated by the Pleasure trend; the new product offer has well-thought flavors and unusual ingredients combinations.

The Health trend is refreshed particularly with the increase of the vegetal products which become the second innovation trend in 2019. The Medical trend rank third with the development of products rich in nutrients or for the digestive system.

Note that Naturalness is not a priority direction for innovation (three times less than the world average). This trend, already commonplace in the United Kingdom, today does not set any products apart.

The Physical axis is particularly dynamic in the UK in 2019. The Well-being and Slimness trends stand out with, for the latter, a very large offer of products that are low in sugar and/or in calories.

OUT OF HOME

FOOD SERVICES

GLOBAL STUDIES

This year, Gira deciphered catering trends on 11 countries.

Three main themes guided the studies and represent the major trends of the out of home consumption found in the different countries studied:

TRANSPARENCY

Open kitchen, highlights on values, ethics in restaurants

ENVIRONMENT

Waste management, environmental concerns

A NEW WAY TO CONSUME

Digital rise, answers for healthy food expectations and decrease in meat consumption

COMPOSITION OF THESE STUDIES

The first part is dedicated to **figures of the out of home market consumption**. The social-economic data comes from specialized institutes, while data on the catering market comes from companies specialized in the sector of foodservice.

The second part focuses on **consumer habits** and expectations at restaurants.

Then, the last part represents a **decryption of concepts**, trends and food within the countries as well as an analysis of the impact of these trends on the catering sector.

THE FOUNDER'S WORD

The overview of french food is quickly evolving and customers have new expectations. That's why Gira is eager to gauge the trends and give its expert advice and ideas.

The story of Gira begins in 1989. Since then, we are proud to work with some valuable companies which have been following us for 30 years now! We have continued this journey of a constant dedication to our clients by offering them customised solutions and always guide them through all the steps of their projects.

In fact, our main target is to guide and advise our clients successfully all along their projects. We opened our scope as we advise now, not only professionals of the sector, but everyone who is interested in making business in the restaurant industry. Our greatest assets and the key to our success is our team: our experts are passionate and have a strong experience on the field. Continually watching out for new trends, we analyse the market and the customers' behaviours to be able to anticipate their needs.

FOOD AWARENESS AND A DIGITAL REVIVAL OF THE SECTOR

A SECTOR FOCUSED ON **FOOD SECURITY**

86% of consumers are concerned about the food safety of the products they consume.

Consumers expect quality and safety in restaurants.

Awareness of the relationship between food and health.

PROGRESS STILL POSSIBLE ON THE **ECOLOGICAL FACTOR**

Heavy use of plastic, although some conservators are trying to reduce the amount of plastic used.

Government measures to develop "green" catering industry.

A COUNTRY DEPENDENT ON **IMPORTS**

Beginning of the development of **local production**

Consumer interest in **organic products** with still some inequalities

THE BOOM OF **VEGETABLE MEAT** CONSUMPTION

A vegetable meat market growing by 14.3% annually since 2014**

AN INNOVATIVE MARKET IN TERMS OF TECHNOLOGY AND **DIGITAL TECHNOLOGY**

Deployment of Meal Delivery and Click&Collect

Development of technological innovations such as robots to transform the customer experience.

Development of Dark Kitchen in major cities

A CATERING OFFER SHARED BETWEEN TRADITIONALISM AND GLOBAL TRENDS

A SECTOR THAT IS GLOBALLY POORLY COMMITTING TO THE **ENVIRONMENT**

New green trends are emerging in tourist areas and could spread across the country

BUT...

Very little organic products at the restaurant

Consuming little meat and local produced food is part of the culture. Most Indonesians cannot afford to buy imported foods.

Indonesia has serious issues in terms of waste management, mainly due to take-away food packaging.

NEW NEED FOR **TRANSPARENCY** ON FOODS SERVED AT THE RESTAURANT.

New food safety concerns, especially hygiene concerns

Restaurants in tourist areas are trying to promote a local and responsible offer.

BUT...

Little thought is given to restaurant food in terms of nutritional quality in a country where the overall daily diet remains very balanced

Very few demand on ethical, green or local commitment. Price is what matters first.

EMERGENCE OF THE **DIGITIZATION** OF THE RESTAURANT INDUSTRY

Globally important use of social networks and review sites.

Take-away food has always been strong in the country. It is now going digital, bringing delivery to the forefront, especially in the largest cities.

BUT...

No cashless in a country where more than 50% of adults do not have a bank account

Digital tools are too onerous for business owners

ITALIANS CATERERS ARE INCREASINGLY COMMITTED TO THEIR OFFER, WHETHER IN TERMS OF PRODUCTS OR RECIPES

AN EFFORT TO **RESPECT THE ENVIRONMENT** IS GROWING IN RESTAURANTS

Search for **local and seasonal products**

76% believe that today restaurants are careful to offer customers alternatives of dishes considered healthier

6% of Italians are vegetarians and 0.9% are vegans^{**}. But meat consumption isn't reducing in restaurants. And plant-based meat substitutes only begin to take some market shares.

ITALIANS ARE MORE **RESPECTFUL** FOR PRODUCTS BUT ALSO FOR PEOPLE BEHIND THEM AND THEIR WORK.

Italian origin is the first criterion for selecting a product

CONSUMERS EXPRESS THEIR DESIRE FOR **HEALTHY AND SUSTAINABLE** PRODUCTS

Pleasure is still the most important reason to eat out, but they look for healthy dishes

CATERING GROWS **OUTSIDE ITS WALLS ...**

Appearance of **Dark Kitchen** in Milan and Rome. Development is expected to increase in the next 5 years.

The **online food delivery market** represents 590 million Euros via platforms. Majority of users are from north of Italy (65%)*

... AND **DIGITAL** ENTERS ITALIANS' WAY OF LIFE

And digital enters Italians' way of life but not with payment

Before COVID-19, the use of cash for payment was around 86%^{***}. However payment without contact is becoming a source of security

SPANISH RESTAURANT SECTOR GOES GREEN WITH STRONG DEMAND FOR ORGANIC PRODUCTS AND ENVIRONMENTAL ENGAGEMENT

CATERING IS INVOLVED FOR THE ENVIRONMENT

Reducing waste and plastic in restaurants with government campaigns such as "More Food, Less Waste".

Shorter supply chains and more local supplier.

The demand for organic products in the catering sector is increasing strongly, driven by a young population (30% of Spanish organic consumers are under 35 years old)*.

AWARENESS OF SPANISH PEOPLE FOR THE RELATIONSHIP BETWEEN **FOOD AND HEALTH**.

The demand is for healthier products, lower in fat and sugar.

Vegetarian and flexitarian diets are developing slowly (6.3% vegetarians and 1.3% vegans)**.

A MASSIVE USE OF **DIGITAL** IN CATERING INDUSTRY

Development of ordering and payment applications within restaurants.

Artificial intelligence is making its entry into the catering sector with actors such as Beesniss.

DISTRIBUTION CHANNELS ARE DEVELOPING THANKS TO **DIGITAL**

Delivery is growing and particularly affects the millennials.

66% of Spanish people used a delivery service at least once in 2018***.

Development of the Dark Kitchens in the main Spanish cities.

THE UNITED ARAB EMIRATES IS SEEING A GROWING DEMAND FOR HEALTHIER AND MORE ORGANIC PRODUCTS. RESTAURANTS ARE EXPANDING THROUGH MULTIPLE DISTRIBUTION CHANNELS.

A DEPENDENT COUNTRY BUT COMMITTED TO **LOCAL** AND **WASTE REDUCTION**.

A country dependent on imports to feed its population (90% of food needs are imported).

Limited local production but emerging in some regions.

A commitment to reducing food waste, the Emirates records 196kg* of food wasted per year per capita.

A STRONG DEMAND FOR **HEALTHIER** AND MORE **ORGANIC PRODUCTS**.

Increased demand for healthier and more organic products in restaurants.

Appearance of vegetarian and vegan offerings in restaurants. Fake meat is making a gradual entry on the menu.

DISTRIBUTION METHODS ARE **DIVERSIFYING**

A boom in meal delivery, 3 out of 4 people get their meals delivered at least once a week in the UAE.

86% of restaurants are offered on delivery platforms.

THE RISE OF **DARK KITCHEN**

20% of current operators use Dark Kitchens, 30% plan to create one.
